**Internet Influence in Scientific research development for
university Instructure By Using The Factor Anatgsis**

Dr.Hamid K.Mutaab

Tahir R.Dikheel

Ali J.Kadhmi

Abstract

The development in countries depends on scientific researches by studying the phenomena not face us in 6 our daly life .The scientific research flaws by asset of defectives such as new progress such as a great information revaluation by using computers and its scientific applications such as internet . in recent years the internet begins to develop the scientific research procedures and its used widely in from here the importance of this re search to study the internet uses in develop the scientific research uses by universities unstructured in Iraq university by using the statistical procedure which is called by factor analysis .

The strategic vision of the university leaders and its role in the management of internal customer relations

Applied study at the University of Kufa

at the University of Kufa / Ass.Prof. D. Youssef al-Sultan Hjeim / college of Administration and Economics / University of Kufa / Asst. Lect. Fawzi Hashem Dabbas Al-Abbadi / college of Administration and Economics / University of Alkofa.

Abstract

The current era could be characterized by the continuous change according to the requirements of life and different dynamic change in the external environment which facilitated the process to influence all the organizations under these changing conditions in all areas in general and university education in particular. Now all organizations need to see administrative innovative and creative vision and is characterized by growth and add value to the organization that espouses the vision to enable decision makers at the University (leadership) to adapt the different environment variables.

Especially we live in a world of competition raging in different kinds of work whether it is an industrial or service, thus the strategic leader became the thinking mind, who builds the map for his organization and in accordance with his open, inclusive vision and expectation of what it would be in the the future or medium term. Thus there will be leadership skills creativity and the ability to make decisions in accordance with the attitudinal culture owned by the strategic leader through the customs, traditions, values and the ability to take the necessary measures to solve any crisis facing organizations in the future and the harmonization of vision owned by strategic leader in the university and how to achieve the loyalty of the personnel inside Organization and promote dissatisfaction and add real value to customers in the future entrants fact that this study focus on all individuals within the university was fixing the rest of the other variables which can be searched by other researchers.

The Relationship between the Emotional Intelligence and the strategies of the planned change (Appliect study in Al-Kufa University)

Asst.lect Fadhel Radhy Ghebash

Asst.lect Huseen Ali Abid Al-Rasool

Asst.lect Amir Ali AL-Atoy

Abstract

This research aims at testing the relationship between leader's emotional intelligence level and the type of planning change strategy in sample of AL-Qufaa university collages. This sample consists of (66) individual from in cuding the dean the depart chief and dean assistant. This study has hypothesized that there relationship between emotional intelligence and planning change strategies. The data have been collected by using a questionnaire which includes tow parts. The first part concerns emotional intelligence according to measuring of (ECI). While the second part concerns planning change strategies. In this study we depend on some statistical tools as mean, standardized deviation, and correlation coefficient (Pearson) for testing the hppotheses the study. One of the important recommendations of the study indicates that high education leaders should join emotional learning programs for improving level of their emotional intelligence.

The Arabic available of water resources and demands of the social and economic improvement Development

Prof.Dr.Adeeb Qasim shindi - Assistant prof.Dr.Rahman Hassan Ali

Abstract

Water,earth,seeds and the suitiable climate inaddition to the human being represent the important elements of the economic environments-in the sense that there is no agriculture without these elements.The existence of water and

not anything else represents discount element in agricultural enlargement, and it represents the basic corner in economic stoical environment in all its sides. Particularly in Arab homeland because of that the large part from its lands is in the dry girdle and in the semidry from the world.

The large part of the surface water resources in the Arabic homeland represents the picture of sharing water with Arabic countries and with non Arab countries existing outside the Arabic region. And estimate that the resources of water with non Arab countries about 64% from the total surface water yearly for use, this causes in negative sides in the Arab land in addition to the political and economic and social complexities. The resources of water in the regional boundaries to the Arab homeland estimating about 54% from the total surface water yearly. This study aimes at showing the water resources in the Arab homeland and the suitable technique for using it and demands of the economic and social environment.

We arrive to some conclusions and recommendation which are necessary if carried out.

The level of education during 1990-2004 in Al-Qadisiya Province

Asst.Prof. D. Moussa Khalaf Awad / Dean of the college of Administration and Economics / University of Qadisiya / Asst Lect . Abbas Asfour Lafta / College of Administration and Economics / University of Qadisiya

Abstract:-

The research deals with analyzing for The data of the research includes the indicators of infrastructure for both the financial and human sides in this respect.

The research aims at evaluating the level of the human development the educational aspect and the suggestions to raise this important aspect. The research studies two important economic sides; the first side represents the economic and social importance of education and the abilities of creating qualified human sources to participate in building

the society. The second side focuses on equality of opportunities for having the work and education between male and female.

The research starts with a theory which is that Al-Qadisiya Province has unbalanced educational aspect. This aspect suffers from many defaults in financial and human infrastructure. The educational aspect is considered the cornerstone for pushing the wheel of development in any country because a wide group of human sources belong to this aspect and the majority of those people are qualified to enter the field of work a regular way even if they didn't have the opportunity to complete their education. As a sequence, a defect will be seen in society. At the same time, we can see a lack in the financial support to qualify this aspect and increasing its adequateness in quality and quantity.

To achieve the aims of the research, the research is divided into three aspects. The first aspect deal with the increasing interest in education and explaining its economic and social work. The second aspect deals with evaluating the human development indicators about the educational side from 1990 to 2004. the third chapter has the conclusions and recommendations.

Reading in the federal budgets of Iraq Dimensions and Derceptions

**Assistant Professor Dr. Salim Abdul Hassan Resan
Qadisiyah University / College of Administration and Economics**

Abstract

The present study aims at the possibility of making the budget keep pace with the major targets and this represents the significance of such a study. It concentrates upon the process of redistributing the income among the social individuals. And this, in turn, facilitates the process of employment, unemployment, inflation and raising the level of

living. Such assort of budget treatment achieves public welfare.

Accordingly, the research based on the premise that the public budget planning tool, however, the State is a mirror reflecting the overall economic activity on the basis that it can exercise power is not without its spending and can be spent without access to resources.

The budget is a deliberate plan in the light of the needs and possibilities of ministries, regions and provinces in the light of the capacity to mobilize resources to cover the possible public expenditure.

To shed light on such aims, the study is concerned with the following:

It deals with the theoretical aspects of the budget and the importance of a concept, rules , characteristics, the stages of implementation, and the types of public budgets.

Second topic

It also tackles the structure of the structure of the federal budget, which include three main components of revenue and expenditures, budget and analysis dimensions, the results of the study was completed to the main conclusions and formulate appropriate recommendations.
